**DO NOT OVER TIGHTEN U-BOLT!**  
May brake U-bolts or may bend boot protector (Torque no more than 5 foot Lbs). If you bend the boot protector they may rub or tear the CV boots.  
After installing the protector: turn the tires left to right, check the rims and CV boots for any type of rubbing.  
After doing this, you can cut the end of the U-bolts off below the head of the nut, so that they will not hang up on bush.
